---

## Web Developer

---

### PROFESSIONAL SUMMARY

---

Dedicated IT enthusiast with strong problem-solving and adept at adapting to diverse work environments. I will graduate in programming and Internet technologies. I excel in leadership, possess exceptional communication and thrive in collaborative teams. Proficient in Java, JavaScript, HTML, React, and CSS. Eager to apply skills for impactful solutions and enhanced productivity.

---

### TECHNICAL SKILLS

---

- **WEB** : HTML5, CSS, React
- **Programming** : JavaScript, Java EE/SE, PHP, C#, C++, SQL, JQuery.
- **Mobile** : React Native, Android
- **IDEs** : Visual Studio Code, IntelliJ, NetBeans, Visual Studio, Android Studio.
- **Tools** : Github Issues, Trello, Asana, PowerShell, Maven, TOMCAT
- **Project Management** : Scrum, AGILE methodology
- **Operating System** : Windows, Android, iOS

---

### PROFESSIONAL SKILLS

---

- Collaboration
- Exceptional Time Management
- Innovation
- Continuous Learning
- proficient at thriving in fast-paced environments

---

### EDUCATION

---

**Programming And Internet Technologies**, Attestation of college studies

September 2022-current at College Universel - Montreal, QC

**Information Technology**, Bachelor in Information Technology University of Kigali - Rwanda

---

### PROJECTS

---

#### React Js-MovieMaven

September 2023

Created MovieMaven, a user-friendly movie recommendation web app for cross-device access. It offers personalized movie suggestions, streamlining the movie discovery process. My roles included user Login implementation, performance optimization, and enhancing user interactions. I contributed to GitHub for version control and task tracking. The project was built with React.js, modern JavaScript libraries, and npm for dependency management.

Developed BudgetBuddy, an Android finance app for diverse device sizes, facilitating monthly budget planning and tracking in collaboration with a team. I led the record interface development, implementing efficient CRUD operations. I also managed task tracking through GitHub. The project was constructed using Android Studio, utilizing Java as the primary language and Gradle for dependency management.

**JavaScript - Hangman**

**June 2023**

Independently created an engaging word-guessing game called "Hangman." Users decipher words from various categories in a challenging 6-attempt format. If unsuccessful, the mystery word is revealed. Developed using HTML, CSS, and JavaScript in Visual Studio Code.

---

**PROFESSIONAL EXPERIENCE**

---

**Crew Member,**

**04/2023 - Current**

McDonald's – Montreal, QC

- Work well with teammates and accepted coaching from the management team.
- Prepared products following restaurant, health, and safety standards and procedures.
